

# Abeer Shahzad

Flutter Developer | UI Designer | Quick Learner

## About Me

I'm a passionate and hardworking Flutter developer currently studying in my first semester of university after completing my FSC. I've completed a 3-month internship and developed two demo projects — a professional chat app and a Quran app. I've worked with Firebase, Supabase, and ZegoCloud, and have strong UI design, logic building, and problem-solving skills. I'm eager to continue learning and improving every day.

## Skills

Flutter	Dart	Firebase	Supabase
ZegoCloud	HTML	CSS	JavaScript
UI/UX Design	Problem Solving	Communication	

## Projects

### Professional Chat App

A real-time chat application built with Flutter and Firebase featuring authentication, messaging, and smooth UI animations.

### Quran App

An elegant Quran application developed using Flutter, offering offline reading, search features, and clean UI for easy navigation.
